PROFESSIONAL SUMMARY

A proactive and detail-oriented Master of Computer Applications (MCA) student with a strong foundation in Data Structures, Algorithms, and Machine Learning. Experienced in full-stack web development and published an IEEE research paper on scalable and efficient resource management frameworks using Deep Reinforcement Learning. Proficient in Python, Java, PHP, and JavaScript frameworks, with hands-on exposure to both frontend and backend development. Eager to apply academic knowledge and internship experience in a challenging software development or data science role.

EXPERIENCE

Full Stack Web Development Intern

11/2024 – 01/2025

Dotch Endeavours Pvt. Ltd. 📍

Bangalore

- Completed a 6-week intensive internship focused on Full Stack Web Development.
- Gained practical experience in building and deploying responsive web applications using React, Next.js, PHP, and MySQL.
- Contributed to developing modern UIs, RESTful APIs, and scalable backend services.
- Collaborated with a team through the full software development lifecycle, from planning to deployment.

EDUCATION

Bachelor of Computer Applications (BCA)

08/2020 – 08/2023

Vivekananda Institute of Management 📍

Bangalore

CGPA 7.84

Master of Computer Applications (MCA)

02/2024 – 10/2025

JSS Academy of Technical Education 📍

Bangalore

CGPA 8.85

TECHNICAL SKILLS

Languages

Python, Java, JavaScript, HTML, CSS

Frontend

React, Next.js, Tailwind CSS, Bootstrap

Backend

PHP

Databases

MySQL

AI & Data Analytics

Machine Learning, Deep Reinforcement Learning, Data Analysis

Tools & Platforms

GitHub, VS Code, Jupyter Notebook, Linux

ACADEMIC & PERSONAL PROJECTS

Radio Resource Allocation Under DoS Attacks using DRL | MCA Major Project

06/2024 – 10/2024

- Engineered a Hierarchical State Abstraction Framework to overcome the curse of dimensionality in wireless networks.
- Formulated the problem as an MDP and implemented DQN and a novel Hybrid DDPG (HDDPG) model.

- Built DoS-resilient scheduling and power-control mechanisms ensuring network robustness.

Online Food Order System | Full-Stack Web Application

11/2024 – 01/2025

- Developed an online ordering platform for restaurant management and customer convenience.
- Built a dual-panel system with customer ordering and an admin dashboard for menu and user control.
- Designed a fully responsive UI using Bootstrap, ensuring smooth performance across all devices.
- Tech Stack: PHP, MySQL, JavaScript, jQuery, HTML, CSS, Bootstrap

Electronic Store Management System BCA Group Project

12/2022 – 01/2023

- Built a desktop inventory management system with automated billing and stock tracking.
- Frontend: VB.NET | Backend: Microsoft SQL Server

Predictive Analysis for BigMart Sales using Machine Learning BCA Major Project

05/2023 – 06/2023

- Designed a web app to predict retail sales using regression and classification ML models.
- Executed a complete data pipeline including preprocessing, feature engineering, and model optimization.
- Tech Stack: Python (Scikit-learn, Pandas, NumPy), HTML

Telegram Bot for Attendance Automation | Personal Project

08/2024 – 09/2024

- Created a custom Telegram bot using Python + Selenium to scrape and automate university attendance tracking.

PUBLICATIONS

A Novel Abstraction Framework for Efficient Radio Resource Management Using Deep Reinforcement Learning

IEEE Conference Paper

Manoj Kumar N, Manjunath B Talawar

- Developed a hierarchical abstraction framework integrating Deep Reinforcement Learning to optimize wireless resource allocation.
- Applied DQN and Actor-Critic algorithms to enhance QoS compliance and decision accuracy
- Achieved 60-80% reduction in training time while maintaining 95-97% policy accuracy.
- Improved scalability to manage 20+ UEs and enhanced robustness under DoS attack conditions.
